## Walk Behind Scrubber

## T15 Series

\*The image shown here is indicative only. If there is inconsistency  
\*Between the image and the actual product, the actual product shall govern

Version No.: V2.0 20220407

Product Features / Efficient

- ▶ With the cleaning width of 350mm, it is compact and flexible and suitable for cleaning the narrow areas, including the dead corners
- ▶ 1×24V/28Ah lithium battery provides the endurance of up to 90 minutes (T15BT)
- ▶ Electronically controlled water regulation, the water output can meet the operation time of 40 to 124 minutes, thus achieving accurate control, effective water saving and efficient water use
- ▶ Water output from the center of the motor is better for the mixing of solution and detergent, and the further even distribution on the brush
- ▶ The anti-overflow design at waste vacuum head prevents wastewater from entering the vacuum motor
- ▶ The telescopic vacuum hose can be shortened as much as possible while ensuring the horizontal moving of the squeegee
- ▶ Soft start of brush motor can reduce the burden of motor and battery
- ▶ Built-in charger design avoids stains, water residues and potential safety hazards

**Flexible and compact body, powerful cleaning effect. Multi-angle cleaning during forward and backward directions, leaving no residue at edges and corners. Multiple patents, reliable quality.**

Built with self-driving motor, it can move forward without pushing (T15BT)

When the head is lifted, the squeegee automatically rotates 180°, which is suitable for cleaning various corners

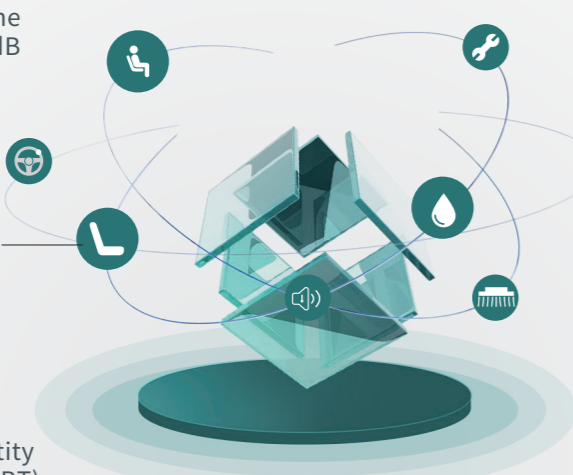

2×12V/36Ah maintenance-free battery provide the endurance of up to 135 minutes (T15B)

Product Features / User-friendly

Ergonomic design of the handle for easier operations such as pushing, gripping, holding and so on to apply in a variety of scenarios

- Small storage volume, convenient storage and transportation
- The vacuum motor is featured with ECO mode, and the noise of the machine is lower than 68 dB
- Full touch button, two-color display,
- The recovery tank pipe and vacuum pipe are externally connected, which is convenient for plugging and unplugging
- Visual display of electric quantity and water level (T15B, T15BT)
- Ingenious handle, comfortable touch and easy operation
- The cover plate of recovery tank is integrated with the main unit of the water inlet, which is convenient to install and disassemble
- Handle angle can be adjusted to meet different heights and using habits
- The vertically laid solution and recovery tanks can be quickly disassembled and assembled

Parameters

	T15E	T15B	T15BT
Volume of solution tank		10L	
Volume of recovery tank		15L	
Working width		350mm	
Squeegee width		450mm	
Maximum working efficiency	1597m <sup>2</sup> /h	1597m <sup>2</sup> /h	1800m <sup>2</sup> /h
Brush specification		13 Inches	
Brush pressure		30kg	
Rotation speed of brush disc	130rpm	120rpm	120rpm
Driving motor power	/	/	24V/180W×2
Brush motor power	AC110V/120W or AC220V/120W	DC24V/250W	DC24V/250W
Vacuum motor power	AC110V/400W or AC220V/400W	DC24V/250W	DC24V/250W
Motor soft starter		Standard	
Delayed shutdown of vacuum motor		Standard	
Battery specification	/	12V/36Ah×2	24V/28Ah
Battery type		Lead acid battery	Lithium battery
Operation duration	/	135Min	90Min
Cable length	15m	/	/
Unit dimension		640×460×1100mm	
Net weight (excluding batteries)		40kg	

Accessories

13" Water lock brush

Rubber strip

13" Pad holder (optional)

Application scenarios

Office

Campus

Plant Workshop

Supermarket

Hospital

Traffic Hub
